**DOCTOR / PATIENT ID:** 

**PAGES:** 1 of 1

**DATE COLLECTED: 5/11/2017 DATE RECEIVED:** 5/11/2017

**DATE OF REPORT: 5/12/2017** 

**PATIENT** 

REPORT, SAMPLE Name:

DOB: 11/01/1990

Gender: M

## **PRACTITIONER**

## **DEMODR, DEMODR TEST**

2602 S. 24th Street Phoenix, Arizona 85034

| TEST  |                      | RESULT     |                 |                            |  |
|---|----------------------|------------|-----------------|----------------------------|--|
| Array 7X - Neurological Autoimmune Reactivity Screen - Expanded | IN RANGE<br>(Normal) | EQUIVOCAL* | OUT OF<br>RANGE | REFERENCE<br>(ELISA Index) |  |
| Myelin Basic Protein IgG + IgA                                  | 0.81                 |            |                 | 0.1-1.4                    |  |
| Myelin Basic Protein IgM  | 0.79                 |            |                 | 0.3-2.7                    |  |
| Asialoganglioside IgG+IgA                                       | 0.67                 |            |                 | 0.1-1.4                    |  |
| Asialoganglioside IgM   | 0.75                 |            |                 | 0.3-2.6                    |  |
| Alpha + Beta Tubulin IgG+IgA                                    | 0.78                 |            |                 | 0.4-1.4                    |  |
| Alpha + Beta Tubulin IgM  | 0.67                 |            |                 | 0.3-2.1                    |  |
| Cerebellar IgG+IgA  | 0.70                 |            |                 | 0.2-1.4                    |  |
| Cerebellar IgM  | 0.90                 |            |                 | 0.2-2.0                    |  |
| Synapsin IgG+IgA  | 0.87                 |            |                 | 0.1-1.2                    |  |
| Synapsin IgM  | 0.92                 |            |                 | 0.2-1.6                    |  |

<sup>\*</sup> Reference ranges are calculated based on the mean ±2 standard deviations (SD). Results > 1 SD, and <2 SDs above the mean are considered to be equivocal. An equivocal result represents the range between negative and suspicious low positive results. Results >2 SDs are considered out of range, and positive.
